Subject: RE: Moving forward on Flint Hills refinery site.

Hi Kira,

I will get back to you tomorrow with more details, but yes, I think a telephone meeting would be good to discuss how best to share documents and the extent of EPA involvement. I'm waiting on my end to hear back from a few folks. But I'll send a follow-up email tomorrow.

Thanks for the email and thank you for the support!

Jim

Hi Jim

Region 10 is very much in support of helping DEC with technical support on the Flint Hills site. Please let us know whether you would like to set up an initial scoping call to discuss Ada and R10 involvement. Kira

Hi Jim:

I have received permission to support you in this request. The EPA Region has one request, that we coordinate everything through them so they have awareness. If you will send the material for review and your instructions directly Kira Lynch, she will forward them on to me.

Subject: Alaska DEC Contacts

Hello Dr. Wilson,

I am glad to hear that you're able to assist ADEC. Below is contact information for Alaska Department of Environmental Conservation staff involved in oversight of the Flint Hills Refinery contaminated site, or involved in understanding sulfolane degradation and/or fate and transport:

Project Manager : Tamara Cardona, Ph.D.

Contaminated Sites Program Manager : Steve Bainbridge, P.E.

Contaminated Sites, Private Sites Program Manager : Bill Janes

Degradation Sub-group leader : Jim Fish

They are *cc'd* on this email; please include them on your correspondence to me acknowledging EPA's Ada Lab "peer review" role in helping understand the degradation of sulfolane. I understand staff from EPA Region 10 would also like to be involved.

Also, when you're ready, I can forward you some additional project details, including some degradation-related documents to review.

Thank you for your help with this project. I look forward to working with you.

Jim
